EXPERIENCE

BNY Mellon | Pershing — Lead Software Developer

June 2016 - PRESENT

- Contribute to the development of an internal Angular framework built from Angular libraries, used by every Front-End system in our company
- Focus on the development of Angular 8 libraries and Spring Boot microservices for Agile based applications
- Take leadership in creating diagrams and developing components for complex financial business requirements
- Work with a component sharing module to develop and deploy multiple components under one portal using System.js
- Develop web applications in Dojo by implementing grids and custom widgets
- Enhance user experience by implementing adaptive and ADA friendly components
- Write unit tests for front end and server side code with tools such as Karma, Jasmine and JUnit
- Emphasize code scalability and consistency across team members during dev reviews
- Implement CSRF and XSS security measures to applications and write guides for them
